Dear Mr. Zobell:

Re: Coal Stockpile and Conveyor Surface Facilities Map, Utah Fuel Company, Skyline Mine, ACT/007/005, Folder #2, Carbon County, Utah

During our discussion last Wednesday, May 27, 1992, regarding the open coal storage area at the railroad loadout, I requested a surface facilities map showing the location of the coal stockpile and conveyor. You stated that a surface facility map had been sent to the Division. Subsequently I checked the correspondence and the only maps sent to the Division, in regards to the railroad loadout coal stockpile, is Map 3.2.3-1A.

Map 3.2.3-1A is the rail loadout flowsheet, which is a general schematic of the silos and conveyor maps. Before I can complete my review, I will need a surface facilities map with the stockpile and conveyor belt locations shown.

If you have any questions, please feel free to contact me.

Sincerely,

Wayne Western  
Reclamation Engineer
